EXPERIENCE

Front-End Developer

June 2020 - Present

EGM AI Construction

- Built internal tools used to help construction companies doing Multimillion-Dollar contracts better track expenses and employees.
- Developed project visualization dashboards using React and Next.js that helped 200+ projects hit their deadlines and budget goals.
- Collaborated in an agile scrum environment to implement new features and worked cohesively with designers and developers.

Front-End Developer

Aug 2020 - Present

Elevate AB

- Built an application listed on the Shopify app store from design to development that helps merchants increase revenue with A/B testing.
- Utilized the Shopify API to handle functions necessary for the application to best serve Shopify merchants.

Front-End Developer

Feb 2020 - May 2020

Asend Inc

- Developed a production-ready React Native app that used a No SQL database, user authentication, graphql, and a node.js backend.
- Worked directly with designers, developers, and product managers to build cohesive products that met business needs.

PROJECTS

Buildpage

bit.ly/BuildPage0

- Built a modern responsive website using React and Next.js that displays a software solution and its features.

Shopflow

bit.ly/Shopflow

- A responsive eCommerce site built in React and Next.js that displays a variety of products and uses a CDN to serve content.

EDUCATION

Rutgers University

Major in Computer Science
